

Probios Aqua (Nutri feed)

Introduction

Probios Aqua is a customized natural microbial/ enzyme product with specific strains for aquaculture and hatchery.

Unique biological formulation that is chosen for 100 % green technology to degrade the toxic organic components and improve water quality.

Composition

Bacillus subtilis, Bacillus licheniformis, lactobacillus acidophilus, nutrition enzymes etc.

Light tan powder, Weak odor;

Bacteria count $>1 \times 10^{10}$ CFU/g;

Application

Aquaculture and Hatchery

Benefit

- ✓ Maintains healthy pond condition for growth, productivity, and sustainability
- ✓ Increases feed efficiency and digestibility
- ✓ Effective across a wide range of biologically relevant feed and animal types
- ✓ Helps prevent colonization of pathogenic bacteria, improving animal gut health
- ✓ Improves fish and shrimp growth rate and survival rate
- ✓ Cost-effective and its performance for the end-user yields a leading return on investment

Dosage & Method

If mixing with feed, 1 kg per 100 kg feed

If pond spray, dose 0.15 ppm, once per week

Routine use can maintain aquatic environment.

Dissolve with water at 1: 20 ratios; keep settling 2 hrs for activation before dosing

Suggest to dosing at morning time when sunshine weather. Caution to dosing when rainy weather or insufficient D.O, suggest to activate aerator during dosage.

Caution

Do not mix use with bleach, caustics, disinfectants or other chemicals

Packing and shelf life

2 year shelf life, 1 kg per foil bag, 10 kg per carton, 15 kg per drum.

Storage

Store in cool, dry location, keep out of direct sunshine and moisture. Once opened, should be use it within 30 days to prevent activation. Keep out of reach of children.
